

DisplayNote & Nanolumens Partner to Simplify Content Sharing in Meeting Spaces

Montage now embedded in the new Captivate Series, enabling instant, wireless sharing right out of the box.

Belfast, UK, 19th August DisplayNote, a company dedicated to removing the friction from sharing ideas in meeting and learning spaces, is pleased to announce a new partnership with Nanolumens, an industry-leading manufacturer and designer of cutting-edge LED displays and solutions. Nanolumens has selected DisplayNote's wireless sharing software, Montage, as the embedded solution for its newly upgraded Captivate Series.

A More Seamless Meeting Starts Here

With Montage built directly into the Captivate Series, users can instantly share content from any device, without the need for additional hardware, cables or downloads. The integration delivers an effortless, ready-to-use collaboration experience that removes common meeting room frustrations, such as locating the right cable, downloading the correct app, or switching between presenters, allowing participants to focus entirely on their ideas.

The embedded Montage solution offers a range of powerful features designed to support effective collaboration in spaces of all sizes.

Key features include:

- Wireless screen sharing from any device, no apps or dongles required
- Support for multiple presenters, enabling natural collaboration flow
- Low-latency, high-resolution display performance
- Secure, scalable deployment ideal for both enterprise and education
- No additional hardware or configuration needed

Choosing the Right Partner

"At DisplayNote, we focus on making technology disappear into the background so that people can focus on their ideas," said Ed Morgan, CEO of DisplayNote. Nanolumens choosing Montage for their next-generation display is a strong validation of our mission. Together, we're helping teams and educators share content without disruption, delay, or complexity."

The partnership also reinforces DisplayNote's commitment to hardware interoperability, expanding the Montage-ready ecosystem across a broader range of displays and environments.

"Nanolumens is committed to delivering display solutions that impress visually and make collaboration effortless," said Kurt DeYoung, Chief Revenue Officer for Nanolumens. "By embedding DisplayNote's Montage software into our Captivate Series, we're providing our customers with a ready-to-use, wireless sharing experience from day one – no extra setup, no learning curve, just simple and effective communication."

The partnership reinforces DisplayNote's commitment to hardware interoperability, expanding the Montage-ready ecosystem across a growing range of displays and environments. For Nanolumens customers, the integration delivers a seamless and intuitive sharing experience that enhances both meeting efficiency and audience engagement.

About DisplayNote

DisplayNote creates collaboration tools that simplify how people present, share, and interact with content in meeting rooms and classrooms. From wireless casting to remote screen control, DisplayNote removes the friction from everyday communication helping users focus on what really matters.

About Nanolumens

Nanolumens, a US-based LED design and manufacturing company, creates world-class digital displays that transform physical spaces across diverse markets. As pioneers of True Curve™ technology, Nanolumens is dedicated to elevating industry standards, crafting bold and immersive displays that make a lasting impact. With a visionary team of experts, they bring creative concepts to life, delivering custom solutions that captivate audiences and inspire digital transformation. Each display is engineered with durability in mind, using premium materials like gold wiring to ensure lasting quality. Committed to excellence, Nanolumens combines innovation and precision to set new standards in LED technology.
